Audit of Car Ownership Models Gerard de Jong 2002 RAND Europe has carried out a research project on car ownership modeling, called 'Audit of car ownership models, for the Transport Research Centre (AVV) of the Dutch Ministry of Transport, Public Works and Water Management. This report presents a review of existing models for car ownership. The review contains a description and comparison of existing Dutch car ownership models and a review and comparison of recently developed models in the international literature and models used in practice. The report also includes recommendations on directions for potential development for improving the AVV car ownership models. The background of this audit is the desire of AVV to obtain information on the basis of which a well-founded decision can be made on the development of an improved car ownership model that can produce robust and sensible car ownership forecasts for all kinds of variants of variabilisation of the road tax (MRB) and car purchase tax (BPM). As part of this project, a number of policy advisers were interviewed about what types of outputs are required from a car ownership model, what should be the forecasting horizon and what should be the policy variables to be simulated.

Het Tweede machinetijdperk Erik Brynjolfsson 2014-10-08 Internationale bestseller over de impact van technologie op ons leven: Google Glasses, zelfrijdende auto's, computers die het menselijk brein vervangen... De digitalisering heeft ons leven drastisch veranderd, en we staan nog maar aan het begin van deze revolutie. 'Vanaf nu wordt de verandering pas echt duizelingwekkend', aldus Erik Brynjolfsson en Andrew McAfee, beiden verbonden aan het prestigieuze MIT. 'En het is aanpassen of verliezen.' Miljoenen mensen dreigen hun baan te verliezen, precaire machtsevenwichten verschuiven en de sociale ongelijkheid groeit. Dit tweede tijdperk der machines kan echter ook zorgen voor meer welvaart. Maar dan moeten we nu de juiste keuzes maken.

The History of Cartography, Volume 4 Matthew H. Edney 2020-05-15 Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment, the highly anticipated fourth volume, offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans, both at home and in overseas territories, from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted: Enlightenment cartography encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume's more than four hundred

encyclopedic articles explore the era's mapping, covering topics both detailed—such as geodetic surveying, thematic mapping, and map collecting—and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries.

Waarom we altijd tijd te kort komen Dan Ariely 2010-04-28 Wanneer je mensen herinnert aan de tien geboden, zijn ze minder snel geneigd te liegen, ook als het atheïsten zijn. Een aspirientje van een duur merk helpt beter tegen hoofdpijn dan een goedkoop eigen merk, zelfs al zijn de pilletjes identiek. Als we érgens op kunnen rekenen, dan is het wel op de irrationaliteit van menselijk gedrag. En dus maakt het niet uit hoeveel voorlichting een overheid geeft over de gevaren van onbeschermd seks: zodra de opwindings toeslaat, wordt het gezonde verstand overboord gekieperd, zoals Ariely met een amusant experiment laat zien. Waarom we altijd tijd te kort komen toont met verrassende voorbeelden en onderzoeken aan hoe slecht we in staat zijn de juiste beslissingen te nemen en hoe we met dat besef ons voordeel kunnen doen. Net als Malcolm Gladwell slaagt Ariely erin om de nieuwste inzichten over menselijk gedrag voor iedereen bruikbaar te maken
