Indian Education in the American Colonies, 1607-1783 Margaret Szasz 1988 Armed with Bible and primer, missionaries and teachers in colonial America sought, in their words, "to Christianize and civilize the native heathen." Both the attempts to transform Indians via schooling and the Indians' reaction to such efforts are closely studied for the first time in *Indian Education in the American Colonies, 1607-1783*. Margaret Connell Szasz's remarkable synthesis of archival and published materials is a detailed and engaging story told from both Indian and European perspectives. Szasz argues that the most intriguing dimension of colonial Indian education came with the individuals who tried to work across cultures. We learn of the remarkable accomplishments of two Algonquian students at Harvard, of the Creek woman Mary Musgrove who enabled James Oglethorpe and the Georgians to establish peaceful relations with the Creek

Nation, and of Algonquian minister Samson Occom, whose intermediary skills led to the founding of Dartmouth College. The story of these individuals and their compatriots plus the numerous experiments in Indian schooling provide a new way of looking at Indian-white relations and colonial Indian education. -- Provided by publisher.

The Evolution of College English Thomas P. Miller 2011-01-09 Thomas P. Miller defines college English studies as literacy studies and examines how it has evolved in tandem with broader developments in literacy and the literate. He maps out "four corners" of English departments: literature, language studies, teacher education, and writing studies. Miller identifies their development with broader changes in the technologies and economies of literacy that have redefined what students write and read, which careers they enter, and how literature represents their experiences and aspirations. Miller locates the origins of college English studies in the colonial transition from a religious

to an oratorical conception of literature. A belletristic model of literature emerged in the nineteenth century in response to the spread of the "penny" press and state-mandated schooling. Since literary studies became a common school subject, professors of literature have distanced themselves from teachers of literacy. In the Progressive era, that distinction came to structure scholarly organizations such as the MLA, while NCTE was established to develop more broadly based teacher coalitions. In the twentieth century New Criticism came to provide the operating assumptions for the rise of English departments, until those assumptions became critically overloaded with the crash of majors and jobs that began in 1970s and continues today. For models that will help the discipline respond to such challenges, Miller looks to comprehensive departments of English that value studies of teaching, writing, and language as well as literature. According to Miller, departments in more broadly based institutions have the potential to redress the historical alienation of English departments from their institutional base in work with literacy. Such departments have a potentially quite expansive articulation apparatus. Many are engaged with writing at work in public life, with schools and public agencies, with access issues, and with media, ethnic, and cultural studies. With the privatization of higher education, such pragmatic engagements become vital to sustaining a civic vision of English studies and the humanities generally.

[The First Way of War](#) John Grenier 2005-01-31 This 2005 book

explores the evolution of Americans' first way of war, to show how war waged against Indian noncombatant population and agricultural resources became the method early Americans employed and, ultimately, defined their military heritage. The sanguinary story of the American conquest of the Indian peoples east of the Mississippi River helps demonstrate how early Americans embraced warfare shaped by extravagant violence and focused on conquest. Grenier provides a major revision in understanding the place of warfare directed on noncombatants in the American military tradition, and his conclusions are relevant to understand US 'special operations' in the War on Terror.

Handbook of Reading Research Rebecca Barr 2016-11-18 A comprehensive overview of important contemporary issues in the field of reading research from the mid 1980s to mid 1990s, this well-received volume offers readers an examination of literacy through a variety of lenses--some permitting microscopic views and others panoramic views. A veritable "who's who" of specialists in the field, chapter authors cover current methodology, as well as cumulative research-based knowledge. Because it deals with society and literacy, the first section provides the broadest possible view of literacy. The second section defines the range of activities culturally determined to be a part of the enterprise known as literacy. The third focuses on the processes that individuals engage in when they perform the act of reading. The fourth section visits the environment in which the knowledge that comprises literacy is passed on from one generation to the next. The last section, an epilogue to the whole enterprise of reading research, provides apt philosophical reflection.

The Economy of British America, 1607-1789 John J. McCusker

2014-01-01 By the American Revolution, the farmers and city-dwellers of British America had achieved, individually and collectively, considerable prosperity. The nature and extent of that success are still unfolding. In this first comprehensive assessment of where research on prerevolutionary economy

stands, what it seeks to achieve, and how it might best proceed, the authors discuss those areas in which traditional work remains to be done and address new possibilities for a 'new economic history.'

Before Harlem Ajuan Maria Mance 2016-03-15 Despite

important recovery and authentication efforts during the last

twenty-five years, the vast majority of nineteenth-century African American writers and their work remain unknown to today's readers. Moreover, the most widely used anthologies of black writing have established a canon based largely on current interests and priorities. Seeking to establish a broader perspective, this collection brings together a wealth of autobiographical writings, fiction, poetry, speeches, sermons, essays, and journalism that better portrays the intellectual and cultural debates, social and political struggles, and community publications and institutions that nurtured black writers from the early 1800s to the eve of the Harlem Renaissance. As editor Ajuan Mance notes, previous collections have focused mainly on writing that found a significant audience among white readers. Consequently, authors whose work appeared in African American-owned publications for a primarily black audience—such as Solomon G. Brown, Henrietta Cordelia Ray, and T. Thomas Fortune—have faded from memory. Even figures as celebrated as Frederick Douglass and Paul Laurence Dunbar are today much better known for their “cross-racial” writings than for the larger bodies of work they produced for a mostly African American readership. There has also been a tendency in modern canon making, especially in the genre of autobiography, to stress antebellum writing rather than writings produced after the Civil War and Reconstruction. Similarly, religious writings—despite the centrality of the church in the everyday lives of black readers and the interconnectedness of black spiritual and intellectual life—have not received the emphasis they deserve. Filling those critical gaps with a selection of 143 works by 65 writers, *Before Harlem* presents as never before an in-depth picture of the literary, aesthetic, and intellectual landscape of nineteenth-century African America and will be a valuable resource for a new generation of readers.

The Librarian's Guide to Genealogical Services and Research James Swan 2004 For the patron who thinks she can trace her lineage back to the Mayflower or the student trying to find the beginnings of his family tree, family history is an individualized and often specialized strand of research. Now James Swan, a librarian and genealogist with forty years of experience, helps to make any librarian an expert in genealogy. He covers the research process in detail and shows where to find and how to use all the documents involved - censuses, birth, marriage and death Certificates, and many often-overlooked personal papers. Methods for improving library service to patrons, including building collections, acquiring and preserving local data, identifying and accessing remote resources, and more are covered in-depth. An entire section is devoted to a step-by-step guide for constructing a family history, which can be used by librarians, archivists, family history workers or interested amateurs. A checklist of key indexes and databases is included to ensure thorough research. Sections for technology link users to the genealogical resources on the Web. The companion CD
