Teaching Intensive and Accelerated Courses

Raymond J. Wlodkowski 2010-08-09 In this comprehensive resource, Raymond J. Wlodkowski and Margery B. Ginsberg describe how to meet the challenge of teaching intensive and accelerated courses to nontraditional learners and working

adults. By making motivation and cultural relevance essential to instruction, they clearly show what instructors can do to enhance learning in classes that can last from three to six hours. Teaching Intensive and Accelerated Courses makes full use of the authors' twenty years of experience researching and teaching accelerated courses, along with selected strategies from Wlodkowski's classic Enhancing Adult Motivation to Learn, to offer tried-and-true practices instructors can use to provide continuously engaging learning. Praise for Teaching Intensive and Accelerated Courses "Part-time teachers who work in accelerated degree programs are an enormous—and grossly underserved—group of adult education faculty. In this indispensable text, Wlodkowski and Ginsberg, two teachers with extensive firsthand experience of accelerated learning formats, provide an accessible, practical, and highly readable

guide to engaging learners in these programs. Warm, wise, and down-to-earth, this will be an invaluable resource for teachers in these programs and for faculty developers everywhere."—Stephen D. Brookfield, Distinguished University Professor, University of St. Thomas, Minnesota "Whether you are an experienced teacher of accelerated courses or about to become a new one, I can't think of a better guide and standard-setter than this book. Wlodkowski and Ginsberg have created an instructional theory with practices that mirror the very principles and processes they advocate. Central to their thesis is the need to create conditions that will allow adults' natural desire to learn to emerge; in my view, this perspective is often lost in adult learning courses in the name of efficiency or productivity. That is one of the many reasons this book is refreshing in both its approach and the values it

espouses."—Pamela Tate, president and CEO, The Council for Adult and Experiential Learning "What a helpful resource for faculty professional development! The information is strategic without being formulaic. New faculty can use this book as a resource to design their materials and to use their existing skills to help adults learn. The parts of this book that focus on graduate students are extremely insightful."—Victoria Gardner, director, Office of Multicultural Affairs, University of Washington School of Medicine

Evidence-based Practice in Nursing

Action Research Davydd J. Greenwood

1999-04-15 Supported bilaterally by Sweden and Norway, the Scandinavian Action Research Development Program (ACRES — Action Research in Scandinavia) emphasized conceptualizing research questions and self-conscious writing processes for experienced action researchers. Participants came from Norway, Sweden, Finland, Holland, Great Britain, and the United States. A learning experiment in the tradition of Scandinavian industrial democracy, ACRES had both intellectual and organizational tensions common to action research projects. This book includes theoretical and historical overviews of action research, reflections on the writing process, narratives about the design and difficult internal processes of ACRES, and a selection of the participants' writings. A particularly unique feature of the book is the discussion of the problematic relationship between action research and conventional modes of research writing and

an analysis of the complex social processes collaboratively managed projects create, in combination with a set of participant cases.

Define Universe and Give Two

Examples Barton E. Dahneke 2006 This book examines the methods of two potential paths to truth, science (physics) and religion (Christianity). Both contain inherent limitations. Scientists often regard Christians as naïve because they accept subjective facts. Christians regard materialists as blinded by narrow vision. These and other issues in histories of science and Christianity are comparatively examined to discover the most reliable method for identifying truth. Comparative criticism provides deeper insights into both methods rather than a study of each by itself.

Instrumental Music Education Evan Feldman 2015-12-21
Instrumental Music Education:

Teaching with the Musical and Practical in Harmony, 2nd Edition is intended for college instrumental music education majors studying to be band and orchestra directors at the elementary, middle school, and high school levels. This textbook presents a research-based look at the topics vital to running a successful instrumental music program, while balancing musical, theoretical, and practical approaches. A central theme is the compelling parallel between language and music, including "sound-to-symbol" pedagogies. Understanding this connection improves the teaching of melody, rhythm, composition, and improvisation. The companion website contains over 120 pedagogy videos for wind, string, and percussion instruments, performed by professional players and teachers, over 50 rehearsal videos, rhythm flashcards, and two additional chapters, "The Rehearsal Toolkit," and "Job Search

and Interview." It also includes over 50 tracks of acoustically pure drones and demonstration exercises for use in rehearsals, sectionals and lessons. New to this edition:

- Alternative, non-traditional ensembles: How to offer culturally relevant opportunities for more students, including mariachi, African drumming, and steel pans.
- More learning and assessment strategies
- The science of learning and practicing: How the brain acquires information
- The philosophies of Orff and El Sistema, along with the existing ones on Kodály, Suzuki, and Gordon.
- The Double Pyramid of Balance: Francis McBeth's classic system for using good balance to influence tone and pitch.
- Updated information about copyright for the digital age

Joining the Mission Susan VanZanten 2011-02-18

Joining the Mission is a helpful guide for new (and experienced) faculty at religious colleges and universities. Susan VanZanten here provides an orientation to the world of Christian higher education and an introduction to the academic profession of teaching, scholarship, and service, with a special emphasis on opportunities and challenges common to mission-driven institutions. From designing a syllabus to dealing with problem students, from working with committees to achieving a balanced life, VanZanten's guidebook will help faculty across the disciplines Art to Zoology and every subject between understand better what it means to pursue faithfully a vocation as professor. Susan VanZanten's Joining the

Mission is an exceptional resource for all faculty members at Christian colleges and universities. While it is a very practical guide to teaching at a university, the book also helps the reader understand and wrestle with the nuances of what it means to be a faculty member at a mission-driven institution. I appreciate VanZanten's contribution to articulating why mission is important at our institutions, why we care about it so much, and how we can better accomplish it. Morality, Reflection, and Ideology Edward Harcourt 2000-11-23 How far can our moral beliefs and practices survive the reflective understanding we have of them? This is the question posed by *Morality, Reflection, and Ideology*, thus initiating a discussion in which the concept of the moral or ethical

and those of reflection and ideology appear together for the illumination of each. The intricate relations between these concepts are explored by eminent contributors from the UK and the US, including Bernard Williams. They demonstrate how this question arises in a variety of different areas of philosophy, from the work of a particular historical figure to the metaphysics of morals, and from moral psychology to ethical and political theory.

Het Gele Behang Charlotte Perkins Gilman 2016-04-24 'Het gele behang' (1892) van Charlotte Perkins Gilman is het beklemmende verhaal van een geesteszieke vrouw. Het is een klassiek verhaal binnen de feministische en gothic literatuur, waarin horror en romantiek gecombineerd worden. In 'Het gele behang' stelt Gilman het gebrek aan zeggenschap van vrouwen over hun eigen leven en de weerslag hiervan op hun geestelijk en fysiek welbevinden, in de

19e eeuwse Amerikaanse maatschappij, aan de kaak. Het verhaal vertoont veel raakvlak met Charlotte Perkins Gilman's eigen leven. Na de geboorte van haar dochter onderging ze een postnatale depressie. Ze werd behandeld door, de in het verhaal genoemde arts, Weir Mitchell. Hij schreef haar een rustkuur voor: "een zo huiselijk mogelijk leven, zonder potlood, pen en penseel."

Functionalism and Formalism in Linguistics: General papers Mike Darnell 1999 The 23rd UWM Linguistics Symposium (1996) brought together linguists of opposing theoretical approaches □ functionalists and formalists □ in order to determine to what extent these approaches really differ from each other and to what extent the approaches complement each other. The two volumes of *Functionalism and Formalism in Linguistics*

contain a careful selection of the papers originally presented at the symposium. Volume I includes papers discussing the two basic approaches to linguistics; with contributions by: Werner Abraham, Stephen R. Anderson, Joan L. Bybee, William Croft, Alice Davidson, Mark Durie, Ken Hale, Michael Hammond, Bruce P. Hayes, Nina Hyams, Howard Lasnik, Brian MacWhinney, Geoffrey S. Nathan, Daniell Nettle, Frederick J. Newmeyer, Edith A. Moravcsik, Doris Payne, Janet Pierrehumbert, Kathleen M. Wheatley. Volume II consists of case studies which draw upon the strengths of both approaches and thus help to bridge the gap between the two camps; with contributions by: Mira Ariel, Melissa Axelrod, Robbin Clamons, Bernard Comrie, Kees Hengeveld, Erika Hoff-Ginsberg, James Hurford, Lizanne Kaiser, Nicholas Kibre, Simon Kirby, Feng-hsi Liu, André Meinunger, Viola Miglio, Ann Mulkern, Waturu Nakamura, Maria Polinsky,

The Aggregate Production Function and the Measurement of Technical Change Jesus Felipe 2013-10-31

This authoritative and stimulating book represents a fundamental critique of the aggregate production function, a concept widely used in macroeconomics.

A Monetary and Fiscal History of the United States, 1961-2021 Alan S. Blinder 2022-10-11

From the New York Times bestselling author, the fascinating story of U.S. economic policy from Kennedy to COVID—filled with lessons for today In this book, Alan Blinder, one of the world’s most influential economists and one of the field’s best writers, draws on his deep firsthand experience to provide an authoritative account of sixty years of monetary and fiscal policy in the United States. Spanning twelve presidents, from John F. Kennedy to

Joe Biden, and eight Federal Reserve chairs, from William McChesney Martin to Jerome Powell, this is an insider’s story of macroeconomic policy that hasn’t been told before—one that is a pleasure to read, and as interesting as it is important. Focusing on the most significant developments and long-term changes, Blinder traces the highs and lows of monetary and fiscal policy, which have by turns cooperated and clashed through many recessions and several long booms over the past six decades. From the fiscal policy of Kennedy’s New Frontier to Biden’s responses to the pandemic, the book takes readers through the stagflation of the 1970s, the conquest of inflation under Jimmy Carter and Paul Volcker, the rise of Reaganomics, and the bubbles of the 2000s before bringing the story up through recent events—including the financial crisis, the Great Recession, and monetary policy during COVID-19. A lively and concise

narrative that is sure to become a classic, *A Monetary and Fiscal History of the United States, 1961–2021* is filled with vital lessons for anyone who wants to better understand where the economy has been—and where it might be headed.

Writing-Intensive Wendy Strachan

2008-04-01 In one of the few book-length studies of a major post-secondary writing-across-the-curriculum initiative from concept to implementation, *Writing-Intensive* traces the process of preparation for new writing requirements across the undergraduate curriculum at Simon Fraser University, a mid-sized Canadian research university. As faculty members across campus were selected to pilot writing-intensive courses, and as administrators and committees adjusted the process toward full implementation, planners grounded their pedagogy in genre theory—a new approach for many non-composition faculty. So doing,

the initiative aimed to establish a coherent yet rhetorically flexible framework through which students might improve their writing in all disciplines. Wendy Strachan documents this campus cultural transformation, exploring successes and impasses with equal interest. The study identifies factors to be considered to avoid isolating the teaching of writing in writing-intensive courses; to engender a university-wide culture that naturalizes writing as a vital part of learning across all disciplines; and to keep the teaching of writing organic and reflected upon in a scholarly manner across campus. A valuable case history for scholars in writing studies, WAC/WID, and curricular change studies.

From Is to Ought: The Place of Normative Models in the Study of Human Thought Shira Elqayam

2016-08-12 In the study of human thinking, two main research questions can be asked: “Descriptive Q: What is human thinking like? Normative Q: What ought human thinking be like?” For decades, these two questions have dominated the field, and the relationship between them generated many a controversy. Empirical normativist approaches regard the answers to these questions as positively correlated – in essence, human thinking is what it ought to be (although what counts as the ‘ought’ standard is moot). In contemporary theories of reasoning and decision making, this is often associated with a Panglossian framework, an adaptationist approach which regards human thinking as a priori rational. In contrast, prescriptive normativism sees the answers to these two questions as

negatively correlated. Normative models are still relevant to human thought, but human behaviour deviates from them quite markedly (with the invited conclusion that humans are often irrational). Prescriptive normativism often results in a Meliorist agenda, which sees rationality as amenable to education. Both empirical and prescriptive normativism can be contrasted with a descriptivist framework for psychology of human thinking. Following Hume's strict divide between the 'is' and the 'ought', descriptivism regards the descriptive and normative research questions as uncorrelated, or dissociated, with only the former question suitable for psychological study of human behaviour. This basic division carries over to the relation between normative ('ought') rationality, based on conforming to normative standards; and instrumental ('is') rationality, based on achieving one's goals.

Descriptivist approaches regard the two as dissociated, whereas normativist approaches tend to see them as closely linked, with normative arguments defining and justifying instrumental rationality. This research topic brings together diverse contributions to the continuing debate. Featuring contributions from leading researchers in the field, the e-book covers a wide range of subjects, arranged by six sections: The standard picture: Normativist perspectives In defence of soft normativism Exploring normative models Descriptivist perspectives Evolutionary and ecological accounts Empirical reports With a total of some 24 articles from 55 authors, this comprehensive treatment includes theoretical analyses, meta-theoretical critiques, commentaries, and a range of empirical reports. The contents of the Research Topic should appeal to psychologists, linguists, philosophers and

cognitive scientists, with research interests in a wide range of domains, from language, through reasoning, judgment and decision making, and moral judgment, to epistemology and theory of mind, philosophical logic, and meta-ethics.

Knowledge Discovery in Databases:

PKDD 2005 Alípio Jorge 2005-11-07 The European Conference on Machine Learning (ECML) and the European Conference on Principles and Practice of Knowledge Discovery in Databases (PKDD) were jointly organized this year for the 7th time in a row, after some years of mutual independence before. After Freiburg (2001), Helsinki (2002), Cavtat (2003) and Pisa (2004), Porto received the 16th edition of ECML and the 9th PKDD in October 3-7. Having the two conferences together seems to be working well: 585 different paper submissions were received for both events, which maintains the high submission

standard of last year. Of these, 335 were submitted to ECML only, 220 to PKDD only and 30 to both. Such a high volume of scientific work required a tremendous effort from Area Chairs, Program Committee members and some additional reviewers. On average, PC members had 10 papers to evaluate, and Area Chairs had 25 papers to decide upon. We managed to have 3 highly qualified independent reviews per paper (with very few exceptions) and one additional overall input from one of the Area Chairs. After the authors' responses and the online discussions for many of the papers, we arrived at the final selection of 40 regular papers for ECML and 35 for PKDD. Besides these, 32 others were accepted as short papers for ECML and 35 for PKDD. This represents a joint acceptance rate of around 13% for regular papers and 25% overall. We thank all involved for all the effort with

reviewing and selection of papers. Besidesthecoretechnicalprogram,ECMLandPKDDhad6invitedspeakers, 10 workshops, 8 tutorials and a Knowledge Discovery Challenge.

Motivating Minds Elisheva Zeffren
2017-06-27 Would you like to establish an animated classroom atmosphere where students are motivated to gain skills, absorb knowledge, express opinions, and examine alternatives? Would you like your students to reflect on the quality of their thinking and learning? With her usual eloquence, Elisheva Zeffren articulates students' need to think critically, formulate conclusions, and uncover what is relevant and important to modern life. The lucid writing style, easy-to-read charts, creative exercises, practical and concrete goals, make this book simple to revisit. Educators can take the innovative ideas back to their classrooms and implement them with little or no

preparation.

An Essay on the Genius of Shakespeare, &C (Classic Reprint)

Henry Mercer Graves 2017-11-20 Excerpt from An Essay on the Genius of Shakespeare, &C IN submitting the following Essay'itg'the reader, I shall be permitted to mention to him, that I have purposely avoided reading any critique, paper, essay, or remarks on either the genius or the characters of our celebrated Bard. I mention this, more for the professed critic than for the general reader, for the purpose of saying that if plagiarism (than which I know nothing more unpardonable) is to be discovered in the work, I trust it will be attributed to accident, and not wilfulness. Teaching in Nursing E-Book Diane M. Billings 2013-08-13 Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education -- teaching, curriculum, and evaluation. Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been

updated with information on the latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, Teaching in Nursing is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students -- the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to

adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future.

Karl Brunner and Monetarism Thomas Moser 2022-03-15 Economists consider the legacy of Karl Brunner's monetarism and its influence on current debates over monetary policy. Monetarism emerged in the 1950s and 1960s as a school of economic thought

that questioned certain tenets of Keynesianism. Emphasizing the monetary nature of inflation and the responsibility of central banks for price stability, monetarism held sway in the inflation-plagued 1970s, but saw its influence begin to decline in the 1980s. Although Milton Friedman is the economist most closely associated with the development of monetarism, it was Karl Brunner (1916–1989) who introduced the term into the current vocabulary of economics and shaped its meaning. In this volume, leading economists—many of them Brunner's friends and former colleagues—consider the influence of Brunner's monetarism on current debates over monetary policy. Some contributors were participants in debates between Keynesians and monetarists; others analyze specific aspects of monetarism as theorized by Brunner and his close collaborator Allan Meltzer, or address its influence on US and

European monetary policy. Others take the opportunity to examine Brunner-Meltzer monetarism through the lens of contemporary macroeconomics and monetary models. The book grows out of a symposium that marked the 100th anniversary of Brunner's birth. Contributors Ernst Baltensperger, Michael D. Bordo, Pierrick Clerc, Alex Cukierman, Michel De Vroey, James Forder, Benjamin M. Friedman, Kevin D. Hoover, Thomas J. Jordan, David Laidler, Allan H. Conscience and Critic Keith Tudor
2016-11-10 *Conscience and Critic: The Selected Works of Keith Tudor* brings together 35 years of Keith Tudor's finest contributions to the field of mental health. Covering a wide range of subjects that encompass psychotherapy, social policy and positive mental health or wellbeing, Keith reflects on practice and theory from his wealth of experience in various fields of

practice, including probation, counselling, field, hospital and psychiatric social work, psychotherapy, supervision, and education and training. Over the span of his professional career, Keith's concerns and contributions have focused on the interface between psyche and society. This is reflected in his writings on the politics of disability, mental health reform, class-conscious therapeutic practice, the application and critique of theory, health and professional regulation and registration. *Conscience and Critic* will be of interest to psychotherapists and mental health practitioners, as well as students of psychotherapy.
