Kaiser and Führer Robert George Leeson Waite 1998-01-01
There are some remarkable parallels, and some equally interesting differences, between Adolf Hitler and Germany's earlier ruler, Kaiser Wilhelm II. The most obvious parallel is that both were cult figures who brought their country to ruin and the world to war, but when Robert G.L. Waite began to seriously compare the two men, the number of specific similarities was striking. Kaiser and Führer is the first in-depth examination of the similarities and differences between these two twentieth-century political leaders. Waite uses a psychological approach to throw light on the personal lives and politics of Wilhelm II and Adolf Hitler. He compares their intellectual worlds, their wartime strategies, and their tortured childhoods. Both men, we discover, had dual personalities - they could be cruel and kind, cowardly and brave, grandiose and vulnerable. Both exhibited homosexual tendencies yet were strongly attractive to women. We see how the personal pathologies of these two men heavily influenced the public policies that resulted in catastrophe. Thoroughly documented and engagingly written this is a classic work of scholarship that will fascinate historians, psychologists, and general readers alike.

The Kaiser's Last Kiss Alan Judd 2003 It is 1940 and the exiled Kaiser is living in Holland where he spends his days chopping logs and musing on what might have been. When the Nazis invade, the Kaiser's staff are replaced by SS guards, and an unlikely relationship develops between the king and his keeper.
LABOR RELATIONS REFERENCE MANUAL THE BUREAU OF NATIONAL AFFAIRS, INC. 1976

The Kaiser Alan Palmer 1978 "Wilhelm II or William II (German: Friedrich Wilhelm Viktor Albrecht; English: Frederick William Victor Albert) (27 January 1859? 4 June 1941) was the last German Emperor (Kaiser) and King of Prussia, ruling the German Empire and the Kingdom of Prussia from 15 June 1888 to 9 November 1918. He was a grandson of the British Queen Victoria and related to many monarchs and princes of Europe. Crowned in 1888, he dismissed the Chancellor, Otto von Bismarck, in 1890 and launched Germany on a bellicose "New Course" in foreign affairs that culminated in his support for Austria-Hungary in the crisis of July 1914 that led to World War I. Bombastic and impetuous, he sometimes made tactless pronouncements on sensitive topics without consulting his ministers, culminating in a disastrous Daily Telegraph interview that cost him most of his power in 1908. His generals dictated policy during World War I with little regard for the civilian government. An ineffective war leader, he lost the support of the army, abdicated in November 1918, and fled to exile in the Netherlands."--Wikipedia.

Greening Health Care Kathy Gerwig 2014-07-24 The relationship between hospitals and the environment is defined by a glaring contradiction: as health care facilities deliver care at any cost, their environmental footprint -- pollution, waste production, unsustainable food services -- contributes to harming community health. Greening Health Care examines the intersections of health care and environmental health, both in terms of traditional failures and the revolution underway to fix them. Authored by one of the pioneers in health care's green movement, it presents practical solutions for health care organizations and clinicians to improve their environments and the health of their communities. Topics include: making food services sustainable, managing hospital waste, and relevant impacts/mitigating measures related to climate change. As environmental protection grows into an imperative for all aspects of society, Greening Health Care offers an historical and practical approach to sustainable health care delivery.

Fishman's Manual of Pulmonary Diseases and Disorders

Alfred P. Fishman 2002 This book is a quick-reference pocket manual which concisely presents important clinical information contained in the two-volume Fishman's Pulmonary Diseases & Disorders, 3/e. For each condition, the manual covers clinical evaluation, work up, differential diagnosis, and treatment.
