

work and "bad." Rather it will be a conversation about many kinds of personal and social goods that fictions can serve or destroy. While not ignoring the consequences for conduct of engaging with powerful stories, it will attend to that more immediate topic, What happens to us as we read? Who am I, during the hours of reading or listening? What is the quality of the life I lead in the company of these would-be friends? Through a wide variety of periods and genres and scores of particular works, Booth pursues various metaphors for such engagements: "friendship with books," "the exchange of gifts," "the colonizing of worlds," "the constitution of commonwealths." He concludes with extended explorations of the ethical powers and potential dangers of works by Rabelais, D. H. Lawrence, Jane Austen, and Mark Twain.

**The Liberals' Moment** Bruce Miroff 2009 Revisits the largely forgotten story of how the McGovern campaign represented the zenith of sixties-style liberalism, and how its historic defeat still haunts Democrats to this day--and in the process identifies what Democrats must do before they can reassume their role as agents of progressive change.

**The Greening of Protestant Thought** Robert Booth Fowler 2000-11-09 The Greening of Protestant Thought traces the increasing influence of environmentalism on American Protestantism since the first Earth Day, which took place in 1970. Robert Booth Fowler explores the extent to which ecological concerns permeate Protestant thought and examines contemporary controversies within and between mainline and fundamentalist Protestantism over the Bible's teachings about the environment. Fowler explores the historical roots of environmentalism in Protestant thought, including debates over God's relationship to nature and the significance of the current environmental crisis for the history of Christianity. Although he argues that mainline Protestantism is becoming increasingly 'green,' he also examines the theological basis for many fundamentalists' hostility toward the environmental movement. In addition, Fowler considers Protestantism's policy agendas for environmental change, as well as the impact on mainline Protestant thinking of modern eco-theologies, process and creation theologies, and

ecofeminism.

**Fifty Years in Science and Religion** Ian G. Barbour 2004 Ian G. Barbour is the internationally acknowledged pioneer in the field of 'science and religion'. Although public opinion is often swayed by strident voices which attempt to place science and religion in conflict or keep them totally isolated, Barbour's voluminous contributions over the past fifty years have carved out a trusted pathway to constructive dialogue and creative mutual interaction between science and religion. Fifty Years

in Science and Religion brings together nineteen leading scholars in the field to offer an appreciative yet critical assessment of the impact of Barbour's work on science and religion and to point ahead towards future critical areas, goals and tasks that await new research and visionary exploration. This book includes a unique autobiography by Barbour in which for the first time he shares and reflects on his life and work, and a detailed bibliography of Barbour's works. Together, the authors demonstrate how Barbour's writings and the hundreds of scholars who have now become part of the field have changed the course of intellectual history in the West by making possible and necessary a truly constructive engagement between science and religion in the context of inter-religious dialogue and the global human and environmental challenges of our time.

Literacy and Education Uta Papen 2015-07-16 Literacy is a perennial 'hot topic' in Britain and other English-speaking countries. Concerns about falling standards and a 'literacy crisis' are frequently raised. In response, governments initiate new policies and teaching guidelines. This book addresses the current policies, practices and media debates in England, the US, Scotland and Australia. Literacy and Education examines: How literacy is taught to children in primary schools; The place of phonics in current policies and the arguments made for and against it; How teachers deliver phonics lessons and how children engage with the method; The range of literacy practices children engage with throughout the school day and how they contribute to literacy learning; The contributions a social and critical perspective on literacy can make to current debates regarding teaching strategies; A wide range of research conducted in the UK, North America, Australia and other countries. Bringing together policy, practice and public debate and drawing on the author's extensive research in a primary school, this essential new textbook provides questions and tasks for readers to engage with. Literacy and Education is ideal for advanced undergraduate and postgraduate students of literacy and education and students on PGCE courses. It will also be of interest to researchers and teachers.

Religion and Economic Ethics Joseph F. Gower 1990 It remains the case that economic ethics is still an underdeveloped specialization within the discipline of religious ethics. Contemporary commentators have lamented the still emergent status of economic ethics and recently some have begun to point out new directions for this area of moral reflection. Part of the problem has been the historical fact that not many religious ethicists have taken the time to acquire the required specialization competence in economics, economic theory, and history. Religion and Economic Ethics presents nineteen readings that illuminate the economic side of religious ethics. Contributions include: Economic Justice and the Common-wealth of Peoples, by Douglas Sturm; Economic Systems and the Sacramental Imagination, by Joseph La Barge; Common Moral and Religious Grounds for Uncommon Economic Times, by James F. Smurl; Liberation Theology and the Vatican, by Arthur F. McGovern. Co-published with the College Theology Society.

Bearing Witness Courtney S. Campbell 2019-09-09 In Bearing Witness, Courtney S. Campbell draws on his experience as a teacher, scholar, and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care. The book offers a distinctive exposition of a covenantal ethic of gift-response-responsibility-transformation that informs a quest for meaning in the profound choices that patients, families, and professionals face in creating, sustaining, and ending life. Campbell's account of "bearing witness" offers new understandings of formative ethical concepts, situates medicine as a calling and vocation rooted in concepts of healing, affirms professional commitments of presence for suffering and dying persons, and presents a prophetic critique of medical-assisted death. This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician-patient relationship. This innovative interpretation bears witness to the relevance

of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end-of-life ethics and bears witness against the oddities of a market-oriented and consumerist vision of health care that is especially salient for an era of health-care reform.

**The Hauerwas Reader** Stanley Hauerwas 2001-07-02 Stanley Hauerwas is one of the most widely read and oft-cited theologians writing today. A prolific lecturer and author, he has been at the forefront of key developments in contemporary theology, ranging from narrative theology to the "recovery of virtue." Yet despite his prominence and the esteem reserved for his thought, his work has never before been collected in a single volume that provides a sense of the totality of his vision. The editors of The Hauerwas Reader, therefore, have compiled and edited a volume that represents all the different periods and phases of Hauerwas's work. Highlighting both his constructive goals and penchant for polemic, the collection reflects the enormous variety of subjects he has engaged, the different genres in which he has written, and the diverse audiences he has addressed. It offers Hauerwas on ethics, virtue, medicine, and suffering; on euthanasia, abortion, and sexuality; and on war in relation to Catholic and Protestant thought. His essays on the role of religion in liberal democracies, the place of the family in capitalist societies, the inseparability of Christianity and Judaism, and on many other topics are included as well. Perhaps more than any other author writing on religious topics today, Hauerwas speaks across lines of religious traditions,

appealing to Methodists, Jews, Anabaptists or Mennonites, Catholics, Episcopalians, and others.

In addressing this question, the authors of this book discuss the exciting challenges that scholars of both early Christianity and contemporary Catholic social thought face regarding the interaction of historical sources and present issues.

**Ethics and Literary Practice** Adam Zachary Newton 2021-09-09 This volume draws together a diverse array of scholars from across the humanities to formulate and address the question of “ethics and literary practice” for a new decade. In taking up a conjunction whose terms remain productively open to question, fifteen essays survey a range of approaches and topics including genre and disciplinary rhetoric, emergence theory and literary signification, the ethics of alterity, of attention, and of aesthetics, the decolonial and the paracritical, neorealism and contingency, analogy and affect, scripture and national literature. From Seamus Heaney to Hannah Arendt, Teresa Brennan to Stanley Cavell, Ronit Matalon to Édouard Glissant, Uwe Timm to Katherena Vermette, Notes for Echo Lake to the Gospel of St. Matthew, these contributions demonstrate how broadly and fruitfully ramifying its organizing inquiry can be. Bringing such multifarious perspectives to the topic feels only more urgent as language, meaning, and expression enter the crucible of a “post-truth” era.

*Frühe Neuzeit im Videospiele* Florian Kerschbaumer 2014-06-30

»Geschichte« ist zu einem wichtigen Stoff für Videospiele geworden - und trotz ihrer Bedeutung für die populäre Darstellung historischer Inhalte ist sie bislang kaum aufgearbeitet. Obwohl viele Spiele, auch Bestseller, die Frühe Neuzeit behandeln, fehlt - anders als zum Mittelalter oder der Moderne - hier noch die geschichtswissenschaftliche Perspektive. Warum werden frühneuzeitliche Elemente in Videospiele aufgegriffen? Um welche handelt es sich? Wie werden sie verarbeitet? In diese Lücke stößt der Band. Die Beiträge verstehen sich dabei nicht als abschließende Behandlung des Themas, sondern als Wegweiser zu neuen Fragen und Analysemethoden.

*Scripture: A Very Theological Proposal* Angus Paddison 2009-10-10 To identify the biblical texts as 'Scripture' is to make a series of specific claims about this text: that it is drawn into the activity of the triune God of Israel; that its ultimate destination is the worshipping church; and that it has a ministry in shaping Christian thinking and acting. *Scripture: A Very Theological Proposal* advances that the resources for reading Scripture, understanding its claims, and acting upon them will be found by looking to the church's life and doctrines. Reading Scripture with a host of theologians, Paddison proposes a hermeneutic appropriate to reading Scripture both as divine address and the book of the church. The book positions itself by resisting accounts in which Scripture's relationship to God and its life within the church are understood competitively, as if the more we attend to one the less we are attending to the other. Chapters further explore a doctrine of Scripture and the relationship of ethics, doctrine, and preaching to Scripture. A final chapter asks, can, or should, Scripture be read in the university?

The text maintains its ability to bring the central issues into clear focus, while allowing supporting arguments for widely diverse positions to be presented by those who embrace them.

**Incarcerating the Crisis** Jordan T. Camp 2016-04-18 The United States currently has the largest prison population on the planet. Over the last four decades, structural unemployment, concentrated urban poverty, and mass homelessness have also become permanent features of the political economy. These developments are without historical precedent, but not without historical explanation. In this searing critique, Jordan T. Camp traces the rise of the neoliberal carceral state through a series of turning points in U.S. history including the Watts insurrection in 1965, the Detroit rebellion in 1967, the Attica uprising in 1971, the Los Angeles revolt in

1992, and events in post-Katrina New Orleans in 2005. **Incarcerating the Crisis** argues that these dramatic events coincided with the emergence of neoliberal capitalism and the state's attempts to crush radical social movements. Through an examination of the poetic visions of social movements—including those by James Baldwin, Marvin Gaye, June Jordan, José Ramírez, and Sunni Patterson—it also suggests that alternative outcomes have been and continue to be possible.
