Social Change and Halakhic Evolution in American Orthodoxy Chaim I. Waxman 2017-08-01 Chaim Waxman, a prominent sociologist of contemporary Orthodoxy, is one of the keenest observers of American Jewish

society. In illustration of how Orthodoxy is adapting to modernity, he presents a detailed discussion of halakhic developments, particularly regarding women's greater participation in ritual practices and other areas of communal life. He shows that the direction of change is not uniform: there is both greater stringency and greater leniency, and he discusses the many reasons for this, both in the Jewish community and in the wider society. Relations between the various sectors of American Orthodoxy over the past several decades are also considered.

Assisted Reproduction Alexandra E. Sigillo 2019-11-15 Assisted reproductive technology (ART) allows people who are infertile the opportunity to conceive children and form much desired families. Over the past few decades, the number of ART procedures conducted in the United States has steadily increased, in part affected by the growing number of women trying to conceive later in their reproductive lives. This demographic shift in baby making has widened to include a variety of other people who experience social infertility, from single persons to same-sex couples. Media exposure and political attention to the use of ART have aroused public concern and controversy. In *Assisted Reproduction*, Alexandra E. Sigillo and Monica K. Miller explore how media, personal differences, societal influences, and psychological processes shape community sentiment toward ART and ART-related laws and policies. This book is recommended for students and scholars of psychology, sociology, gender and women's studies, communication studies, public health, and legal studies.

The Fertility Doctor's Guide to Overcoming Infertility Mark P. Trolice 2020-01-07 Give yourself the best-possible odds for getting pregnant and having a baby with this concise, expert, and encouraging companion as your guide! In the only general guide to infertility written by a medical doctor who specializes in the subject, Mark Trolice, MD—who is board-certified in

both OB/GYN and REI (Reproductive Endocrinology and Infertility)—shares the practical knowledge he has gained from working in infertility medicine for years, with many hundreds of patients, along with the warmth and wisdom he has acquired from getting to know prospective parents from all kind of backgrounds. The journey from infertility to fertility, from childlessness to a brand-new baby, can be long and arduous. It involves complicated medical diagnoses, a wide range of treatment options, a host of potential lifestyle changes, lots of emotional ups and downs, and—even with the best medical insurance—challenging financial decisions. Your doctors cannot decide everything for you, and that is why an authoritative and comprehensive book, written in clear and understandable language for the layperson, is essential. This is that book. The book opens with an exploration of all the possible causes of infertility, covering both couples who have never been pregnant and ones who have had recurrent losses of pregnancies. Unique among infertility guides, this volume gives roughly equal weight to male and female causes, which is important because about 40% of infertility cases are due to men's issues—and some couples need to address issues in both the prospective mother and prospective father. It covers endometriosis, fibroids, POS (Polycystic Ovarian Syndrome), tubal factor, male factor, and other possible causes. Next it looks at your treatment options. Importantly, these are not just medical interventions, but they also include lifestyle changes you alone can make, involving sleep, diet, exercise, and other forms of self-care. Among medical options, IUI (Intrauterine Insemination), IVF (In Vitro Fertilization), and various surgical procedures are covered in detail. Some couples are lucky to have a short journey to fertility. For others, the process takes years. With a gentle and sure hand, and non-judgmentally, Dr. Trolice guides you through the many decisions you need to make along the way, such as whether or not to continue treatments, whether to change practitioners or treatments, and whether it is a good idea to continue to spend

money on procedures not covered by your insurance. He understands that these are emotionally weighty decisions that involve the future of your family, and he provides ample grounds for optimism and hope, empowering you as you take this journey.

Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of

cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care.
