## **Proteolysis-targeting chimera (PROTAC) for targeted protein ...**

selective small-molecule degraders of estrogen receptor (ER) have been discovered and developed, among which fulvestrant [10] has been approved to treat hormone receptor-positive metastatic breast cancer [11, 12]. Mechanistically, these compounds bind to ER $\alpha$ , induce protein conformational changes, and cause its degradation [13].

## **Current treatment and recent progress in gastric cancer**

toxicity without benefit and no longer is used in modern perioperative regimens.<sup>24</sup> In support of this conclusion is a phase 3 trial that compared surgery with or without perioperative chemotherapy (cisplatin and fluorouracil) and found a similar 5-year OS benefit of 38% versus 24% in favor of perioperative chemotherapy.<sup>25</sup>

## MINISTRY OF EDUCATION

their farmers. This money is used to produce food for western countries. A large percentage is used to buy pesticides and fertilisers to increase crop yield. Some of the crops, such as maize are produced and used as food for humans. However, much is fed to animals such as cows that are then eaten. (a) (i) Name the trophic level represented by:
