**Differential Equations and Boundary Value Problems** C. Henry Edwards 2016-04-05 For introductory courses in Differential Equations. This best-selling text by these well-known authors blends the traditional algebra

problem solving skills with the conceptual development and geometric visualization of a modern differential equations course that is essential to science and engineering students. It reflects the new qualitative approach that is altering the learning of elementary differential equations, including the wide availability of scientific computing environments like Maple, Mathematica, and MATLAB. Its focus balances the traditional manual methods with the new computer-based methods that illuminate qualitative phenomena and make accessible a wider range of more realistic applications. Seldom-used topics have been trimmed and new topics added: it starts and ends with discussions of mathematical modeling of real-world phenomena, evident in figures, examples, problems, and applications throughout the text.

De redding Jayne Ann Krentz 2016-02-04 Dertien jaar geleden verliet Lucy Sheridan Summer River, nadat Mason Fletcher haar redde uit de handen van Tristan. Het is voor haar nog steeds moeilijk deze herinneringen een plek te geven. Maar wat is er met Tristan gebeurd, toen hij direct daarna van de aardbodem verdween? Sindsdien is er veel veranderd: Lucy is opgegroeid tot een aantrekkelijke, succesvolle jonge vrouw en heeft een mooi leven opgebouwd, ver van Summer River. Maar als haar tante Sara omkomt bij een mysterieus auto-ongeluk, ziet Lucy zich gedwongen terug te keren. Als zij en Mason, die nog net zo beschermend is als vroeger, een schokkende ontdekking doen in Sara's huis, heeft Lucy alle hulp nodig om de duistere geheimen uit haar verleden het hoofd te bieden.
