All Horse Systems Go Nancy S Loving 2014-01-01
A ridden horse is an athletic horse, and just as a human athlete needs to gauge his diet, condition his cardiovascular and respiratory systems, and take meticulous care of his muscles, bones, and ligaments, so too must the rider maintain these systems in her horse. Now, for the first time in one, full-color comprehensive book, Dr. Nancy S. Loving, noted equine veterinarian and dressage, event, and distance riding competitor, addresses the singularly challenging needs of keeping the working horse in working order. With chapters devoted to cardiovascular, respiratory, neurological, digestive, and reproductive health, as well to the hooves, bones, joints, tendons and ligaments, muscles, and skin, Dr. Loving provides a thorough understanding of the intricacies of the equine body. However, this is not just another veterinary manual. While diseases are indeed clearly explained, and relevant diagnostic tools and methods of prevention and treatment are offered for various ailments, Dr. Loving sets her book apart by diligently applying her scientific knowledge to the practical needs of every pleasure, sport, and performance horse owner—whether you simply hack with friends or compete at the highest level. Over 500 color photographs and 4,000 index entries suitably enrich this consummate text. Whether used as a study guide to better understand your equine athlete or as a quick-find reference when you notice a mysterious new swelling on his near foreleg, All Horse Systems Go is the integral ingredient to ensuring your horse can perform to the very best of his ability, whatever his task may be.

Hunters (Classic Reprint) Frank Townend Barton 2015-08-05
Excerpt from Hunters Considering the large number of works in connection with horses, and the important position occupied by the hunter, it is somewhat surprising that up to the present time,

so far as the author is aware, no writer has specially devoted his attention, excluding other varieties, to a description of the hunter, unless that of old-time literature, of which a great deal appeared on hunting matters, probably much more than at the present time. Other varieties of live-stock, from cattle down to poultry, have received recognition in monograph form, some pretentious, others less so, but none of them can claim a greater right to individual recognition than the subject of this treatise. As a commercial asset, the hunter ranks high, for the simple reason that its sphere of utility is linked with the most manly, as well as the most costly, form of field sports, namely, that of hunting the fox. The Racehorse Pieter H.L. Ramzan 2014-08-08 Written by one of the UK's leading equine veterinary practitioners, this textbook is dedicated wholly to the veterinary management of the racehorse. The Racehorse: A Veterinary Manual brings together all the major orthopaedic and non-orthopaedic conditions likely to be encountered in racehorse practice and concisely details state-of-the-art 'best practice' for diagnosis and management. The book spans the full range of fields relevant to the clinician, including topics as diverse as rehabilitation, respiratory medicine, exercise physiology, pre-purchase and 'herd health.' Well-illustrated and comprehensive, it succeeds in being both practical and firmly evidence based, making it an invaluable resource for clinicians worldwide as well as a useful reference work for many non-veterinarians in the racing industry.

Land of the Horses Chris Lombard 2022-01-04 An intensely moving memoir of a young man who left heartbreak in Maine to seek healing Out West in the company of horses. Growing up in a small Maine town, Chris Lombard had never ridden a horse—never even touched one. But on one fateful night, as what he'd thought was a happy twenty-something life full of love and possibility fell suddenly apart, he met two horses and looked into their eyes. What he saw inspired him to leave everything he had, and everything he didn't have, behind, and go in search of what was missing. With the little he needed packed in his ten-year-old Pontiac Grand Prix, and little more to go on than a belief that someone would give him a chance, Chris headed west to find work on a horse ranch. His journey took him first to the mountains of Colorado, then the Hollywood Hills of California, and finally, the wild borderlands of Southern Arizona. The settings changed but the same lessons came in quiet moments, movingly captured in these pages: watching horses, reaching out to them, swinging upon their backs. Chris learned new meanings for words—presence, connection, softness, and balance—the elements of good horsemanship feeding a deep hunger he didn't know he had. But learning to ride a horse, learning to communicate with him, to teach him things, these required qualities Chris was only beginning to cultivate. Human nature plans; it pushes and it rushes. And it would take a terrible accident to awaken a whole new awareness for time and space, and Chris's place within it, beside a horse. In the austere beauty

of the Sonora Desert, Chris met a cowboy whose intense love for life on the back of a horse held a deep sadness at bay, but only for so long. Their brief time together, working land and livestock, would bring Chris to the realization that the richly fulfilling new life he'd found held all the answers he sought, but only if he could ultimately leave it behind. Evocatively written, interweaving the author's growing understanding of horses and how we connect with them with his deeply personal experiences, Land of the Horses brings to life a young man's transformation alongside the horses, people, and dramatic landscapes of the American West. Healing heartbreak, falling and getting back on, searching for something true—this is a story that is in all of us. And it shows we are all capable of creating the life we truly want to live.

De paardenfluisteraar Nicholas Evans 2011-10-09 Een enorme truck met oplegger rijdt door een besneeuwd landschap. Niet ver van de weg rijdt een meisje op haar paard door de maagdelijk witte heuvels. De sneeuw knispert onder de hoeven, maar hier en daar, ook bij de kruising waar de truck nadert, is het verraderlijk glad. In enkele fatale seconden wordt het leven van een gezin verwoest. Hoewel de 13-jarige Grace en haar paard Pilgrim ernstig gewond zijn, overleven ze het ongeluk. Annie, de moeder van Grace, gaat voor hen beiden op zoek naar heling en genezing. Haar odyssee brengt haar bij een bijzondere man: Tom Booker, de paardenfluisteraar. In de weken die volgen zullen de levens van alle betrokkenen voor altijd veranderen.
