The Power of Meaning Emily Esfahani Smith 2017-01-10 In a book points the way toward a culture obsessed with happiness, this wise, stirring

richer, more satisfying life. Too many of us believe that the search for meaning is an esoteric pursuit—that you have to travel to a distant monastery or page through dusty volumes to discover life’s secrets. The truth is, there are untapped sources of meaning all around us—right here, right now. To explore how we can craft lives of meaning, Emily Esfahani Smith synthesizes a kaleidoscopic array of sources—from psychologists, sociologists, philosophers, and neuroscientists to figures in literature and history such as George Eliot, Viktor Frankl, Aristotle, and the Buddha. Drawing on this research, Smith

shows us how cultivating connections to others, identifying and working toward a purpose, telling stories about our place in the world, and seeking out mystery can immeasurably deepen our lives. To bring what she calls the four pillars of meaning to life, Smith visits a tight-knit fishing village in the Chesapeake Bay, stargazes in West Texas, attends a dinner where young people gather to share their experiences of profound loss, and more. She also introduces us to compelling seekers of meaning—from the drug kingpin who finds his purpose in helping people get fit to the artist who draws on her Hindu upbringing

to create arresting photographs. And she explores how we might begin to build a culture that leaves space for introspection and awe, cultivates a sense of community, and imbues our lives with meaning. Inspiring and story-driven, *The Power of Meaning* will strike a profound chord in anyone seeking a life that matters.

Story Proof Kendall Haven
2007-10-30 Like Stephen Krashen's important work in *The Power of Reading*, *Story Proof* collects and analyzes the research that validates the importance of story, story reading, and storytelling to the brain development and education of children and

adults. Accomplished researcher and storyteller Kendall Haven, establishes the need for understanding the research findings in neural psychology and brain development and the value of a common definition of story if one is to fully grasp the importance and necessity of story to the development of the human mind. To support his case, he reviews a wealth of research from storytellers, teachers, and others who have experienced the power of story firsthand. The author has collected anecdotal experiences from over 100 performing storytellers and from 1,800 story practitioners (mostly teachers)

who have made extensive use of stories. He has read more than 150 qualitative and quantitative research studies that discuss the effectiveness of stories and/or storytelling for one or more specific applications (education, organizational management, knowledge management, medical and narrative therapy, etc.). Forty of these studies were literature reviews and comparative studies including analysis of over 1,000 studies and descriptive articles. He has also gathered research evidence from his own story performances for total audiences of over 4 million and from conducting story writing

workshops with 200,000 students and 40,000 teachers. **Radicale verlossing** Beatrice de Graaf 2021-06-01 Wat geloven veroordeelde terroristen eigenlijk echt wanneer ze aangeven hun daad in naam van een hogere instantie te plegen? Beatrice de Graaf is als eerste hierover in de gevangenissen met de huidige generatie terrorismege-detineerden in gesprek gegaan. Ze heeft geluisterd naar hun verhalen over frustratie met het eigen leven, woede om aangedaan onrecht en het besluit zich te mengen in de strijd. Uit die verhalen blijkt hoe cruciaal de actuele, geleefde en geloofde

praktijk van radicale verlossing is voor het begrijpen van hun daden. Op basis van interviews met terrorismegevangenen uit Nederland, Syrië, Pakistan en Indonesië - jihadisten en enkele rechts-extremisten - reconstrueert ze hun verhalen van overgave, strijd, opoffering en gehoopte beloning, en ontwerpt ze een manier om de samenhang van geloofsbeleving en terroristische activiteiten beter te begrijpen. Wanneer en hoe inspireren religieuze en ideologische overtuigingen jongeren nu tot een heilige strijd? En wat gebeurt er wanneer die verlangde verlossing uitblijft? Daarmee is dit boek een geschiedenis van

de meest recente periode van terroristisch geweld, maar biedt het ook een nieuw en verrassend inzicht in de even bijzondere als schokkende levensverhalen van terrorismeveroordeelden.

Beatrice de Graaf (1976) is historicus en faculteitshoogleraar Geesteswetenschappen aan de Universiteit Utrecht. Ze onderzoekt de geschiedenis van terrorisme, oorlog en geweld - en is vooral geïnteresseerd in de strijd daartegen. Ze is fellow in het ISIS Files Project/Program on Extremism van de George Washington University, treedt regelmatig op als terrorisme-expert en

Reshaping Philosophy: Michael
Boylan's Narrative Fiction
Wanda Teays 2022-05-25 This
volume offers original essays
exploring what 'fictive narrative
philosophy' might mean in the
research and teaching of
philosophy. The first part of the
book presents theoretical
essays that examine Boylan's
recent books: Teaching Ethics
with Three Philosophical Novels
and Fictive Narrative
Philosophy: How Literature can
Act as Philosophy. The second
and third part offer essays on

how Boylan executes his theory in the practice within his novels from his two series *De Anima* and *Arch*. The book clearly shows the unique aspects of the fictive narrative philosophy approach. First, it makes story-telling accessible to wide audiences. Second, story-telling techniques invoke devices that can set out complicated existential problems to the reader that offer an additional approach to thorny problems through the presentation of lived experience. Third, the discussion of these devices is a way to explore philosophical problems in a way that many can profit from. The book concludes with an essay in

which Boylan responds to the critical challenges set out in Part One and the practical criticism set out in Parts Two and Three. Boylan addresses the key claims made by his objectors and defends his position. He engages with the authors in the way his theory is matched against his actual novels. This is useful reading for both philosophers and professors of literature teaching introductory as well as upper-level courses in the fields of philosophy, literature and criticism.

The Routledge International Handbook on Narrative and Life History Ivor Goodson
2016-10-04 In recent decades,

there has been a substantial turn towards narrative and life history study. The embrace of narrative and life history work has accompanied the move to postmodernism and post-structuralism across a wide range of disciplines: sociological studies, gender studies, cultural studies, social history; literary theory; and, most recently, psychology. Written by leading international scholars from the main contributing perspectives and disciplines, The Routledge International Handbook on Narrative and Life History seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history

work by situating these fields of study within the historical and contemporary context. Topics covered include: • The historical emergences of life history and narrative study • Techniques for conducting life history and narrative study • Identity and politics • Generational history • Social and psycho-social approaches to narrative history With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers and educators interested in narrative theory, analysis and interpretation.

**Personality Psychology Jim
McMartin 2016-01-29**

Personality Psychology: A Student-Centered Approach organizes the field of personality psychology around basic questions relevant to the reader's past, present, and future selves. Answers to the questions are based on findings from up-to-date research and shed light on the validity of personality theories to help students deepen their understanding of their own personalities. Concise, conversational, and easy-to-understand, the Second Edition is enhanced with new chapters, new research that reflects the latest scholarship, and new photos and illustrations throughout.

Doing Narrative Research Molly Andrews 2013-07-22 Written by an international team of experts in the field, the second edition of this popular text considers both the theoretical underpinnings and practical applications of narrative research. The authors take the reader from initial decisions about forms of narrative research, through more complex issues of reflexivity, interpretation and the research context. Existing chapters have been updated to reflect changes in the literature and new chapters from eminent narrative scholars in Europe, Australia and the United States have been added on a variety of

topics including narratives and embodiment, visual narratives, narratives and storyworlds, new media narratives and Deleuzian perspectives in narrative research. This book will be invaluable for all students, researchers and academics looking to use narrative methods in their own social research.

Ethical Excellence Heidi M. Giebel 2020-11-24 "Combines insights from philosophy, psychology, and the biographies of ordinary people to identify principles to guide our ethical development and provide concrete models for an ethical life"--

Everyman News Michele Weldon

2008 "Examines how newspapers have changed over the past few years, becoming story papers. Comparing 850 stories, story approaches, and unofficial sourcing in twenty American newspapers from 2001 and 2004, Weldon reveals a shift toward features over hard news, along with an increase in anecdotal or humanistic approaches to all stories"--Provided by publisher.

Handbook of Personality, Fourth Edition Oliver P. John 2021-01-26 Now in a revised and expanded fourth edition, this definitive reference and text has more than 50% new material, reflecting a decade of theoretical and empirical

advances. Prominent researchers describe major theories and review cutting-edge findings. The volume explores how personality emerges from and interacts with biological, developmental, cognitive, affective, and social processes, and the implications for well-being and health.

Innovative research programs and methods are presented throughout. The concluding section showcases emerging issues and new directions in the field. New to This Edition

*Expanded coverage of personality development, with chapters on the overall life course, middle childhood, adolescence, and early

adulthood. *Three new chapters on affective processes, plus chapters on neurobiology, achievement motivation, cognitive approaches, narcissism, and other new topics. *Section on cutting-edge issues: personality interventions, personality manifestations in everyday life, geographical variation in personality, self-knowledge, and the links between personality and economics. *Added breadth and accessibility--42 more concise chapters, compared to 32 in the prior edition.

The Life Story, Domains of Identity, and Personality Development in Emerging Adulthood Michael W. Pratt

2018 *The Life Story, Domains of Identity, and Personality Development in Emerging Adulthood* focuses on individuals' formulations of the unique episodes and events of their lives that give one meaning and a sense of personal identity. This book brings the growing research on narrative study and the life story into focus by drawing from the existing research on personality development during emerging adulthood. In this book, authors Michael W. Pratt and M. Kyle Matsuba present a series of chapters exploring how one's life story manifests across the many components of their developing identity, including

their religion, morality, vocation, society, and the relationships they have with their parents, peers, and romantic partners. Taking their cue from Erik Erikson's model of adolescent and adult development, the authors show readers exactly how a life story approach can illuminate the distinctive features of an individual's personality and development during this formative phase of life. Organized around a set of life contexts where personality is manifested (i.e. adjustment, personal ideology, close relationships, occupation, and civic life), this book draws on the authors' own longitudinal research on the development of

the life story in emerging adulthood. Throughout the book, they incorporate fascinating case studies and historical examples (e.g., Darwin, Pope Francis, Martin Luther King, Jr., Jane Fonda) of individuals' unique development during this period of life in order to better illustrate the application of this approach to understanding the whole person in context.

The American Dream for Students of Color Gretchen Givens Generett 2021-03-24
The American Dream for Students of Color examines how the American Dream informs beliefs about talent, hard work, and perseverance

rather than dismantling barriers to educational success for marginal students. Using narrative methodologies, connections between the authors narratives and those of school youth and educators are explored.

International Perspectives on Reminiscence, Life Review and Life Story Work Faith Gibson
2018-11-21 Examining recent research and practice on reminiscence, life review and life story work, this book offers critical accounts of the rapidly growing and extensive global literature, and highlights the continuing relevance and effectiveness of these therapeutic methods. The book

includes examples of international practical projects, involving people of all ages, life circumstances, and levels of physical and cognitive functioning. Contributions from contemporary practitioners and researchers give a nuanced appraisal of the methods of engagement and creativity arising from the purposeful recall of our personal pasts. Chapters include reviews of technology, ethical issues including end of life care, working with people with mental health conditions, and working with people with dementia.

Pursuing Happiness: Reading American Romance as Political Fiction Laura Vivanco

2016-02-01 The dominance of popular romance in the United States fiction market suggests that its trends and themes may reflect the politics of a significant proportion of the population. Pursuing Happiness explores some of the choices, beliefs and assumptions which shape the politics of American Romance novels. In particular, it focuses on what romances reveal about American attitudes towards work, the West, race, gender, community cohesion, ancestral “roots” and a historical connection (or lack of it) to the land.

The Strange Case of Donald J. Trump Dan P. McAdams
2020-02-17 The Strange Case

of Donald J. Trump provides a coherent and nuanced psychological portrait of Donald Trump, drawing upon biographical events in the subject's life and contemporary scientific research and theory in personality, developmental, and social psychology. Dan P. McAdams, renowned psychologist who pioneered the study of lives, examines the central personality traits, personal values and motives, and the interpersonal and cultural factors that together have shaped Trump's psychological makeup, with an emphasis on the strangeness of the case--that is, how Trump again and again defies

psychological expectations regarding what it means to be a human being. The book's central thesis is that Donald Trump is the episodic man. The chapters, structured as stand-alone essays each riffing on a single psychological theme, build on each other to present a portrait of a person who compulsively lives in the moment, without an internal story to integrate his life in time. With an emphasis on scientific personality research, rather than political rhetoric, McAdams shows that Trump's utter lack of an inner life story is truly exceptional. This book is a remarkable case study which should be of as much interest to

psychologists as it is to readers trying to reckon with the often confounding behavior and temperament of the 45th President of the United States.

Religion and Organization

Theory 2014-04-02 Despite the profound influence that religious organizations exert, religion occupies a curiously marginal place in organization theory.

This volume aims to make available in one place existing knowledge on religion and organizations, encouraging more organization theorists to include religion as part of their research activities and agenda.

Teaching Our Story Larry A.

Golemon 2010-01-31 Teaching Our Story is based on the

premise that as congregations become intentional story-forming communities, they can shape the lives of millions of generative, faithful, and civic-minded adults. To do so, a framework that relates narrative work to the full range of congregational life is needed.

This book offers such a framework, featuring essays that examine crucial shapers of narrative, outline a course in preaching that addresses crucial questions for today's church leaders, illuminate the creative power of listening to the collective stories of a faith community, and observe what can happen when first-year seminary students are asked to

become story brokers -- integrating the stories from their communities with biblical stories, their own personal stories, and the theological doctrines formed within the story of their tradition

Handbook of the American Short Story Erik Redling

2022-01-19 The American short story has always been characterized by exciting aesthetic innovations and an immense range of topics. This handbook offers students and researchers a comprehensive introduction to the multifaceted genre with a special focus on recent developments due to the rise of new media. Part I provides systematic overviews

of significant contexts ranging from historical-political backgrounds, short story theories developed by writers, print and digital culture, to current theoretical approaches and canon formation. Part II consists of 35 paired readings of representative short stories by eminent authors, charting major steps in the evolution of the American short story from its beginnings as an art form in the early nineteenth century up to the digital age. The handbook examines historically, methodologically, and theoretically the coming together of the enduring narrative practice of compression and concision in

American literature. It offers fresh and original readings relevant to studying the American short story and shows how the genre performs American culture.

The Leader Charles B. Strozier
2011-05-24 Behind every leader is an instructive life story. It often promotes a public image that inspires others to live by it. And, sometimes, even to live or to die for it. As leadership qualities and image issues gain significance in the public discourse, the psychological study of leadership is a critical factor in any discussion. With its trenchant insights into leaders past and present, *The Leader: Psychological Essays, Second*

Edition, updates a pioneering text in this field and provides a solid basis for ongoing dialogue on this important subject. Within the context of the ever-evolving disciplines of psychoanalysis and psychodynamics, this thought-provoking volume examines the lives of several prominent leaders from ancient Greece through the start of the 21st century. The authors explore how these leaders imposed their individual missions and mystiques on others, thereby fulfilling – and, sometimes, creating – distinct needs in their followers. The volume brings into vivid focus issues with the potential for devastating consequences on

the global stage. Coverage includes: Biblical times, ancient Greeks and the seeds of leadership. Lincoln during the 1850s, leading a dividing nation. Thomas A. Kohut on Kaiser Wilhelm II and the German national character. George W. Bush, atonement/redemption narratives and the American Dream. Bin Laden, man and myth. A study of paranoid leadership and its implications for future politics and policy. This must-have Second Edition is indispensable reading for researchers, professors, and graduate students across many disciplines, including political psychology, psychoanalysis, history and political science,

psychiatry, anthropology, and personality and social psychology. It is important reading for anyone with an interest in the life stories of leaders past and present and how they affect our world even long after they are gone

Being!: Five Ways Of Leading Authentically In An Iconnected World Murthy Vikram

2019-09-24 Being! Five ways of leading authentically in an iConnected world is rooted in leadership practice across many sectors and its raison d'etre is to build adaptiveness and resilience in uncertain times. It is credentialed by leaders who have honed their personal effectiveness, grown spiritually

and become more effective and impactful, because of their engagement with its content. It channels wisdom at the intersection of many disciplines and multiple world views to provide deeper insight and meaning to the leadership dilemmas and choices that you constantly face. It integrates both western leadership-thinking with its more evidence-based, cognitive approaches, and eastern philosophy with its more 'mystical' and spiritually-oriented homilies, into a rich tapestry that engages your attention, challenges your capabilities, and leaves you richer and more fulfilled for the effort.

The Redemptive Self Dan P.

McAdams 2013-02-14 In this revised and expanded edition of *The Redemptive Self*, McAdams shows how redemptive stories promote psychological health and civic engagement among contemporary American adults.

[The Redemptive Self](#) Dan P.

McAdams 2013-01-07 How do we as Americans define our identities? How do our stories represent who we are—our successes, our failures, our past, our future? Stories of redemption are some of the most powerful ways to express American identity and all that it can entail, from pain and anguish to joy and fulfillment.

Psychologist Dan P. McAdams examines how these narratives,

in which the hero is delivered from suffering to an enhanced status or state, represent a new psychology of American identity, and in turn, how they translate to understanding our own lives. In this revised and expanded edition of *The Redemptive Self*, McAdams shows how redemptive stories promote psychological health and civic engagement among contemporary American adults. He reveals how different kinds of redemptive stories compete for favor in American society, as presented in a dramatic case study comparing the life stories constructed by Presidents George W. Bush and Barack Obama. McAdams provides

new insight on race and religion in American narratives, offers a creative blend of psychological research and historical analysis, and explains how the redemptive self is a positive psychological resource for living a worthy American life. From the spiritual testimonials of the Puritans and the celebrated autobiography of Benjamin Franklin, to the harrowing stories of escaped slaves and the modern tales in Hollywood movies, we are surrounded by transformative stories that can inform how we make sense of our American identity. But is the redemptive life story always a good thing, and can anyone achieve it? While affirming the

significance of redemptive life stories, McAdams also offers a cultural critique. Through no fault of their own, many Americans cannot achieve this revered story of deliverance. Instead, their lives are rife with contaminated plots, vicious cycles of disappointment, and endless pitfalls. Moreover, there may be a negative side to these beloved stories of redemption—they demonstrate a curiously American form of arrogance, self-righteousness, and naïveté that all bad things can be transformed. In this revised and expanded edition of the his award-winning book, McAdams encourages us to critically examine our own life stories—the

good, the bad, the ups, the downs—in order to inform how we can benefit from them and shape a better future American identity.

De kracht van betekenis Emily Esfahani Smith 2017-04-18 Bestseller over hoe we niet geluk moeten nastreven, maar betekenis en een zinvol leven. In 'De kracht van betekenis'

stelt Emily Esfahani Smith dat we het verkeerde doel hebben nagejaagd. De westerse cultuur is geobsedeerd door geluk. Toch voelen veel mensen zich vervreemd en doelloos, soms zelfs wanhopig. Niet geluk, maar betekenis maakt het leven de moeite waard. Op basis van recent psychologisch onderzoek en inzichten uit de filosofie en de literatuur laat Esfahani aan de hand van vier pijlers zien hoe we een zinvol leven kunnen vormgeven. Ook voerde ze talloze gesprekken met onder anderen een dierenverzorgster, een ex-crimineel en een astronaut, om erachter te komen hoe je zin geeft aan je leven. Esfahani's vier pijlers

voor een zinvol leven: 1. Ergens bij horen, of dat nu je familieleden, milieuactivisten of leden van een boekenclub zijn. 2. Een doel dat ons motiveert iets aan de wereld bij te dragen, hoe bescheiden die bijdrage ook is. 3. Een coherent verhaal over je leven kunnen vertellen, waardoor ervaringen samenhang en betekenis krijgen. 4. Transcendentie, gebeurtenissen waardoor je boven het alledaagse uitstijgt, bijvoorbeeld wanneer je naar mooie muziek luistert, naar de sterrenhemel kijkt of een mystieke ervaring hebt.

Semantics and Psychology of Spirituality Heinz Streib
2015-10-16 This book examines

what people mean when they say they are “spiritual”. It looks at the semantics of “spirituality”, the visibility of reasons for “spiritual” preference in biographies, in psychological dispositions, in cultural differences between Germany and the US, and in gender differences. It also examines the kind of biographical consequences that are associated with “spirituality”. The book reports the results of an online-questionnaire filled out by 773 respondents in Germany and 1113 in the US, personal interviews with a selected group of more than 100 persons, and an experiment. Based on the

data collected, it reports results that are relevant for a number of scientific and practical disciplines. It makes a contribution to the semantics of everyday religious language and to the cross-cultural study of religion and to many related fields as well, because “spirituality” is evaluated in relation to personality, mysticism, well-being, religious styles, generativity, attachment, biography and atheism. The book draws attention to the – new and ever changing – ways in which people give names to their ultimate concern and symbolize their experiences of transcendence.

Narrative Inquiry Kathleen Wells

2011-01-01 "This Pocket Guide to narrative inquiry will present the method's major theoretical underpinnings; rationales for use of narrative research methods within life history and case study frameworks; primary strategies for eliciting, listening to, and transcribing first-person oral narratives; prevailing analytic frameworks for analysis of such data; ethical considerations and Institutional Review Board-related challenges in narrative inquiry; and issues pertaining to trustworthiness and theoretical and empirical generalization. The author, an esteemed researcher, will illustrate concepts from her on-going

narrative investigation of abusive and neglectful mothers who lost and regained custody of their children within one impoverished community, a useful site from which to discuss issues of memory, trauma, context and process, and narrative truth. References to exemplary published narrative studies of questions of concern to social work practitioners in the areas of psychotherapy, child welfare practice, and organizational/community practice, for example, will also be included. The volume is designed, in short, to address the issues an investigator would need to consider in order to

develop a narrative inquiry: questions of theory, method, and meaning. Yet, it is not proscriptive. It will focus on the topical areas an investigator should address when planning a narrative study, and it provides a summary of two or three ways in which scholars have answered each one. This approach recognizes the connections among epistemology, features of social work problems, and method that defy simple categorization and acknowledges the emergent and interdisciplinary nature of narrative inquiry."--Provided by publisher.

The Redemptive Self Dan P.
McAdams 2006

Jull, de vrouw die niets kan
vergeten Jill Price 2013-07-11
Jill Price onthoudt alles. Het is
voor haar onmogelijk om iets,
wat dan ook, te vergeten! Ze is
de eerste mens ter wereld bij
wie een geheugenaandoening
is vastgesteld die men
hyperthymestisch syndroom
noemt het systematisch en
automatisch herinneren van

bijna elke dag in haar leven
sinds haar veertiende. Vraag
haar naar een willekeurige dag
in haar leven, en ze kan
vertellen wat voor dag in de
week dat was, wat ze die
bewuste dag deed en wat er
zich in de wereld afspeelde.
Haar herinneringen voelen aan
als scènes uit videofilms: ze
spelen constant af in haar
hoofd, voor en achteruit,
springend door de jaren, zonder
dat Jill ze kan stoppen. Jill, de
vrouw die niets kan vergeten is
het onvergetelijke verhaal van
Jill, en hoe zij probeert zich met

Dit fascinerende boek verandert
je gedachten over het
geheugen voorgoed.

**George W. Bush and the
Redemptive Dream** Dan P.

McAdams 2010-11-30 George
W. Bush remains a highly
controversial figure, a man for
whom millions of Americans
have very strong feelings. Dan
McAdams' book offers an astute
psychological portrait of Bush,
one of the first biographies to
appear since he left office as
well as the first to draw
systematically from personality
science to analyze his life.

McAdams, an international
leader in personality psychology
and the narrative study of lives,

focuses on several key events
in Bush's life, such as the death
of his sister at age 7, his
commitment to sobriety on his
40th birthday, and his reaction
to the terrorist attacks of
September 11, and his decision
to invade Iraq. He sheds light
on Bush's life goals, the story
he constructed to make sense
of his life, and the psychological
dynamics that account for his
behavior. Although there are
many popular biographies of
George W. Bush, McAdams' is
the first true psychological
analysis based on established
theories and the latest research.
Short and focused, written in an
engaging style, this book offers
a truly penetrating look at our

forty-third president.

Leading Lives that Matter Mark R. Schwehn 2006 "Leading Lives That Matter" draws together a wide range of texts -- including fiction, autobiography, and philosophy -- offering challenge and insight to those who are thinking about what to do with their lives. Instead of giving prescriptive advice, Mark Schwehn and Dorothy Bass approach the subject of vocation as an ongoing conversation. They include in this conversation some of the Western tradition's best writings on human life -- its meaning, purpose, and significance -- ranging from ancient Greek poetry to contemporary fiction.

Including Leo Tolstoy's novella "The Death of Ivan Ilych" as an extended epilogue, this volume will help readers clarify and deepen how they think about their own lives.

Narrative - State of the Art

Michael G. W. Bamberg
2007-01-01 Narrative State of the Art which was originally published as a Special Issue of Narrative Inquiry 16:1 (2006) is edited by Michael Bamberg and contains 24 chapters (with a brief introduction by the editor) that look back and take stock of developments in narrative theorizing and empirical work with narratives. The attempt has been made to bring together researchers from different

disciplines, with very different concerns, and have them express their conceptions of the current state of the art from their perspectives. Looking back and taking stock, this volume further attempts to begin to deliver answers to the questions (i) What was it that made the original turn to narrative so successful? (ii) What has been accomplished over the last 40 years of narrative inquiry? (iii) What are the future directions for narrative inquiry? The contributions to this volume are deliberately kept short so that the readers can browse through them and get a feel about the diversity of current narrative theorizing and emerging new

trends in narrative research. It is the ultimate aim of this edited volume to stir up discussions and dialogue among narrative researchers across these disciplines and to widen and open up the territory of narrative inquiry to new and innovative work.

The Person Dan P. McAdams
2008-12-22 The Person provides psychologists with an organizational scheme for personality psychology. This sets the study of the person into evolutionary and cultural context and divided personality up into three broad areas: dispositional traits, characteristic adaptations, and integrative life stories. The fifth edition has been updated to

reflect advances that have occurred in the field of psychology in the past few years. It presents new findings that have been obtained with respect to the correlates of personality traits, the dynamics of motives and goals in human lives, and the meanings and manifestations of life stories. Discussions are included on the new ideas on evolution and morality as well as the role of culture in personality. Psychologists will also find a much stronger and detailed discussion of psychophysiology of extraversion, neuroticism, and the train of sensation-seeking.

Stories We've Heard, Stories

We've Told Jeffrey Kottler

2014-09-26 This is a book that

integrates what is known from a wide variety of disciplines about the nature of storytelling and how it influences and transforms people's lives.

Drawing on material from the humanities, sociology, anthropology, neurophysiology, media and communication studies, narrative inquiry, indigenous healing traditions, as well as education, counseling,

and therapy, the book explores the ways that therapists operate as professional storytellers. In addition, our job is to hold and honor the stories of our clients, helping them to reshape them in more constructive ways. The book itself is written as a story, utilizing engaging prose, research, photographs, and powerful anecdotes to draw readers into the intriguing dynamics and processes involved in therapeutic storytelling. It sets the stage for what follows by discussing the ways that stories have influenced history, cultural development, and individual worldviews and then delves into the ways that everyday lives are

impacted by the stories we hear, read, and view in popular media. The focus then moves to stories within the context of therapy, exploring how client stories are told, heard, and negotiated in sessions.

Attention then moves to the ways that therapists can become more skilled and accomplished storytellers, regardless of their theoretical preferences and style.

Cultivating Virtue Nancy E.

Snow 2014-12-01 Though virtue ethics is enjoying a resurgence, the topic of virtue cultivation has been largely neglected by philosophers. This volume remedies this gap, featuring mostly new essays,

commissioned for this collection, by philosophers, theologians, and psychologists at the forefront of research into virtue. Each contribution focuses on some aspect of virtue development, either by highlighting virtue cultivation within distinctive traditions of ethical or religious thought, or by taking a developmental perspective to yield fresh insights into criticisms of virtue ethics, or by examining the science that explains virtue development. The essays by Russell and Driver investigate virtue cultivation or problems associated with it from Aristotelian and utilitarian perspectives. Slote addresses

virtue development from the sentimentalist standpoint. Swanton and Cureton and Hill explore self-improvement, the former with an eye to offering solutions to critiques of virtue ethics, the latter from a Kantian ethical vantage point. Slingerland examines contemporary psychology as well as virtue development in the Confucian tradition to counter situationist criticisms of virtue ethics. Flanagan, Bucar, and Herdt examine how virtue is cultivated in the Buddhist, Islamic, and Christian traditions, respectively. Narvaez, Thompson, and McAdams offer descriptive insights from psychology into virtue

development. The result is a collection of extremely creative essays that not only fills the current gap but also promises to stimulate new work on a philosophically neglected yet vital topic.

Non-Equilibrium Social Science and Policy Jeffrey Johnson

2017-01-20 The overall aim of this book, an outcome of the European FP7 FET Open NESS project, is to contribute to the ongoing effort to put the quantitative social sciences on a proper footing for the 21st century. A key focus is economics, and its implications on policy making, where the still dominant traditional approach increasingly struggles to capture

the economic realities we observe in the world today - with vested interests getting too often in the way of real advances. Insights into behavioral economics and modern computing techniques have made possible both the integration of larger information sets and the exploration of disequilibrium behavior. The domain-based chapters of this work illustrate how economic theory is the only branch of social sciences which still holds to its old paradigm of an equilibrium science - an assumption that has already been relaxed in all related fields of research in the light of recent advances in complex and

dynamical systems theory and related data mining. The other chapters give various takes on policy and decision making in this context. Written in nontechnical style throughout, with a mix of tutorial and essay-like contributions, this book will benefit all researchers, scientists, professionals and practitioners interested in learning about the 'thinking in complexity' to understand how socio-economic systems really work.

Autobiography and the Psychological Study of Religious Lives Jacob A. Belzen
2008-01 This volume positions itself on the cutting edge of two fields in psychology that enjoy

rapidly increasing attention: both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching. Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences. Ever since the beginning of the psychology of religion, autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity.

In this volume, a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory.

The Praeger Handbook of Personality Across Cultures [3 volumes] A. Timothy Church

Ph.D. 2017-07-14 This

important multivolume work sheds light on current—and future—research on cultural universals and differences in personality in their evolutionary,

ecological, and cultural contexts. • Uniquely brings together diverse topics and theoretical viewpoints related to personality across cultures, including cross-cultural, cultural, indigenous, evolutionary, and neuroscientific perspectives •

Provides a thorough picture of current knowledge as well as directions for future research •

Comprises 31 chapters by

leading international researchers discussing their respective areas of expertise •

Addresses personality broadly defined to include universal and indigenous traits, personality

types, the self, emotion, motivation, values, beliefs, and

life narratives • Draws on

cultural samples from every

continent except Antarctica
