Exploring the Role of Morphology in the Evolution of Spanish

Joel Rini 1999-11-15

After a brief survey of the perception of morphological change in the standard works of the Hispanic tradition in the 20th century, the author first attempts to refine concepts such as analogy, leveling, blending, contamination, etc. as they have been applied to Spanish. He then revisits difficult problems of Spanish historical grammar and explores the extent to which various types of morphological processes may have operated in a given change. Selected

problems are examined in light of abundant textual evidence. Some include: the resistance to change of Sp. dormir 'to sleep', morir 'to die', the vocalic sequence /ee/, the reduction of the OSp. verbal suffixes -ades, -edes, -ides, -odes, and the uncertain origin of Sp. eres 'you are'.

Important notions such as the directionality of leveling, phonological vs. morphological change in the nominal and verbal paradigms, the morphological spread of sound change, and the role of morphological factors in apparent syntactic change are discussed.

decades have been marked by intense and accelerated economic, political, and cultural processes that have affected urban spaces. These changes have occurred in different parts of cities (traditional centers, edges, peripheries) and at different levels of the urban system (large and medium-sized cities and in their respective areas of influence). Possibly the clearest expression of the spatial effects on cities can be perceived in their morphological transformations, their territorial dimensions, or in their social problems. Until 2008, urban-territorial processes were a reflection of the logic and inconsistencies of an expansive economic context and of a structural context that favored the development of cities through

concurrent processes and actors. As a result, the built land and amount of urbanized and built surfaces increased, together with processes of the expansion and modernization of cities. Since 2008, the expansive economic cycle has ended, and there have been diverse negative consequences. Notably, the construction sector has come to an abrupt halt. Access to credit has also been reduced, and unemployment has increased. The economic recession has caused sociodemographic and socioeconomic issues exemplified by housing vulnerability, with dispossession, evictions, a shortage of social housing, and energy poverty.

Koineization in Medieval Spanish Donald N. Tuten 2003 How and why do changes happen when and where they do? Is it possible to explain changes that occurred centuries ago? These are the central questions addressed in this book, in which the author argues that the development of numerous features of medieval (and modern) Spanish can best be explained as the results of koineization, a process in which mixing among speakers of different dialects leads to the rapid formation of a new mixed and generally simplified variety. The book includes a complete introduction to koineization and detailed study of three stages of dialect mixing in medieval Spanish.
